

# DERBIPAINTE

*Matt acrylic paint for finishing bituminous membranes*

## Description

- ▶ DERBIPAINTE E is a water based acrylic paint mainly applied for aesthetic reasons on smooth waterproofing membranes.

## Advantages

- ▶ Available in different colors
- ▶ Improves aesthetics of waterproofing membranes
- ▶ Offers extra UV protection
- ▶ White and light grey form a heat shield, reducing surface temperature considerably
- ▶ Safe to use and environmentally friendly in all circumstances
- ▶ Water based emulsion, thus contains no solvent (not flammable)
- ▶ Provides effective protection against moss development
- ▶ Improves the quality of recycled rainwater
- ▶ Dries quickly
- ▶ Application suitable on all types of weathered bituminous membranes
- ▶ Combines additional protection and aesthetics

## Colours

White, light grey, black, terracotta

## Usage

- Consumption :
- On new, smooth roofing membrane :  
5 m<sup>2</sup>/l/coat (degrease first with cleanig product and water), apply 2 coats
  - On older roofing membrane :  
Plain : 5 m<sup>2</sup>/l/coat, apply 2 coats  
With sand or granules : first layer 20% thinned with water : 2.5 – 3.5 m<sup>2</sup>/l  
second layer, not thinned : 3.5 m<sup>2</sup>/l
- Equipment :
- roller or brush
  - airless spraygun with a 36/50 or 31/40 Spray tip for large surfaces and 27/40 for small surfaces
- Cleaning material : immediately after use with water
- Processing conditions :
- Drying time :
- dustfree : 1 hour
  - rain free : 6 hours
  - repaint : 6 hours
  - hardening : 24 hours
- 24 hours after application
- Frostfree :
- Substrate Temp. : min. 5 °C
- Ambiant Temp. : min. 5 °C

## Packaging

Can of : 10 l  
20 l

## Technical data

Density : 1,3 – 1,4 kg/l  
Non volatiles : 65 %  
Flashpoint Pensky Martens cc : not applicable

## Storage

Shelf-life (in unopened airtight cans) : 12 months. Protected from frost, with temperature from 5 to 35 °C.
